

GHIBLI-SPECIAL Abrasion resistant hose system with an outer connection

Technical specifications:

It is suitable for sandblasting systems and hydraulic or pneumatic delivering of abrasive medium. Usually, it is used at construction sites, boat building, mining and other areas of the industry. Abrasion resistant hose system.

The hose length manufactured by the customer's requirements. Several designs are possible. Request a quotation!

Operating pressure: 12 bar

Bursting pressure: 36 bar

Heat resistance: -30°C/+70 °C (for short time +80 °C)

Interior: NR/BR rubber, black, electrically conductive, smooth

Exterior: synthetic rubber, black, smooth, fabric imprinted, abrasion resistant ozone and weather resistant

Elektromos ellenállás: 106Ω

Just for order!
